

Your Project Proposal Presentation should cover the following points:

1. The Goal of Your Project.....[1]
 - Clearly define the problem statement and the objectives of your project.
 - What is the purpose of this project?
 - What issue does it address within UMBC?
2. SRS and Requirements Elicitation & Validation.....[2]
 - Explain the expectations set by the stakeholders
 - Describe your understanding of stakeholder expectations.
 - How you have validated your understanding with stakeholders.
 - Functional and Nonfunctional requirements
3. Epics & User Stories.....[1]
 - Describe the initial Product Backlog setup
 - How Epics and User Stories are structured in JIRA
 - Break them into Epics and User Stories
4. Design Representation - UML & E-R Models.....[1]
 - Use Case Diagram to illustrate user interactions.
 - E-R Diagram to show database structure.
5. Sprint Planning, Task Breakdown & progress tracking.....[1]
 - User stories to be completed in Sprint 1.
 - Ensure tasks are clear, achievable, and testable.
 - Progress tracking with burn-down charts
6. Work Agreement & Team Collaboration.....[1]
 - Roles & Responsibilities
 - Collaboration Plan & tools (JIRA, MS Teams, GitHub)
 - Meeting Schedule (stand-ups, spring planning, demo, retrospectives).
 - Work Ethics & Rules (commitments, attendance, version control).
 - Conflict Resolution Plan (how the team will handle issues)
7. Technical Stack & System Architecture.....[2]
 - Explain the technologies you will use for
 - Frontend, Backend, Database, APIs, Hosting & Deployment
8. Customer Engagement & Usability.....[1]
 - How will the stakeholders interact with your system?
 - How will users test and provide feedback?
 - Any planned **feedback loops** to improve the application?

. **NOTE: EACH TEAM WILL NEED TO PRESENT FOR 20 MINUTES TO COVER ALL OF THE AFOREMENTIONED TOPICS.**
