

Rubrics for SRS-Version-1

CMSC 447

1. Introduction (10 points)

- Clear purpose, scope, intended audience, definitions, references (5)
- Relevance to the project context (5)

2. Overall Description (10 points)

- User classes clearly defined (3)
- Operating environment specified (2)
- Constraints, assumptions, dependencies documented (5)

3. Business Rules (5 points)

- Clear and consistent rules described (5)

4. Functional Requirements (15 points)

- Well-structured, numbered functional requirements (5)
- Requirements are complete, unambiguous, testable (5)
- Prioritization or organization (5)

5. Use Cases (15 points)

- At least 3–5 complete use cases with proper structure (actors, triggers, pre/post conditions, flows) (10)
- Clarity of actor actions vs system responses (5)

6. Data Requirements (10 points)

- Logical data model (ER diagram/class diagram) (5)
- Data dictionary with attributes, types, constraints (5)

7. External Interface Requirements (10 points)

- User Interface sketches or descriptions (3)
- Software, hardware, communication interfaces (4)
- Completeness and feasibility (3)

8. Nonfunctional Requirements (10 points)

- Coverage of availability, reliability, scalability, compatibility, security, etc. (5)

Rubrics for SRS-Version-1

CMSC 447

- Prioritization and justification (5)

9. Reporting & Supplemental Info (5 points)

- Reporting requirements (2)
- Notes on frontend/backend, coding practices, or extra considerations (3)

10. Organization & Professionalism (10 points)

- Clear formatting, numbering, and sectioning following SRS template (5)
- Grammar, spelling, professional tone, originality (5)

Grading Note:

- A (90–100): Comprehensive, well-structured, original, and professional.
- B (80–89): Minor gaps, mostly clear and structured.
- C (70–79): Several missing sections, unclear requirements.
- D (60–69): Major missing sections, lack of clarity or structure.
- F (<60): Incomplete, copied, or non-substantive submission.
